050. The ship may try to increase speed in the next several hours to try to make the original drop time. The drop will be made under cover of darkness and will be heavily guarded. The contraband consists of approximately 150-200 plastic bags that change several times to throw off "enforcement listeners." Some of the callsigns listeners can expect are: "Magic," "Downer," "Crazy Eight," and Carmen."

3. (SA/STD/NF) Attached is a sheet and map showing the location he identified.

SUMMARY OF INFORMATION

(probable mothership)

The vessel identified in session #1 (DTD 09 APR 90) continues to sail for the unloading point determined to be 48 09' N / 61 05' W. The time for the exchange is not clear -- there is some discussion between the principals about postponing it 24 hours because of delays inherent to the mother ship."

The current location for the mother ship is 42 01' N / 65 01' W, traveling at 18 knots on a heading of 050'. The ship may try to increase speed in the next several hours to try and make the drop time (if time is not changed).

The drop will be made under the cover of darkness (exact time undetermined) and the drop will be heavily guarded. I perceive the amount of contraband exchanged on the drop to be approximately 150 - 200 plastic bags that are about 2" H x 6" W x 12 " long.

Callsigns used by the mother ship will change several times to throw off "enforcement listeners". Some of the callsigns listeners can expect to hear are: "Magic", "Downer", "Crazy eight", "Carmen".
